## HIGH-SPEED TRAIN REPAIR & REPAINT

Our Engineering & Fabrication departments work closely with South Devon Railway. It is exciting to hear their news about the restoration of a former high-speed train power car for Colas Rail UK.

The power car left the South Devon Railway at the end of February and will be displayed at Colas Rail UK's Rugby depot for its launch.

It is to be named 'Safety Task Force' by Nick Millington MBE of Network Rail.

## FOR SALE - LORCH WELDER

Aluminium Mig welder  
Water cooled  
3 phase  
Less than 50 hours use  
Complete with programmes  
01752 310153 - Lucaz Styles

## QUALITY MANAGER INTERVIEW

We are currently updating our QMS to achieve AS9100 certification, which will demonstrate our ability to consistently provide product that meets customer requirements to the highest possible standard.

Our in-house measurement capability is supported by our Aberlink CMM, giving us the capability to repeatably measure parts to a high degree of accuracy.

CMM training is being rolled out to all production staff, as part of our cross-functional training programme, to enhance our in-house skill levels as much as possible. Once we have attained AS9100 certification, we will be expanding our customer base further into the aerospace, automotive, and other high regulatory sectors.
